

Steiner consensus strings, 351, 353

Steiner tree, 470, 471, 477

string, 3, 4

string alignment, 216

string rotation in, 439

string similarity, 225

string-depth, 91

string-length, 282

strong good suffix rule, 16, 19, 31

structural inference, 341

structure deduction, 248

STS, 61, 131, 395

STS map, 61

STS order, 402

STS ordering, 405

STS-content mapping, 398, 405

stuttering subsequence problem, 249

suboptimal alignment, 321, 325

subsequence, 4, 227

subsequence versus substring, 4, 210, 227, 228

substring, 3, 4

tandem array, 13, 177, 140

tandem repeat, 177, 201, 247

text compression, 164, 445

tRNA folding problem, 250

threshold P -against-all problem, 308

translocations, 492

transpositions, 492

traveling salesman, 401

traveling salesman tour, 402

tree alignment problem, 354

tree compatibility, 464

tree-building algorithms, 448

triangle inequality, 349, 404

triple tree, 478

two-dimensional pattern matching, 84, 85

Ukkonen's algorithm, 94, 95, 107, 115, 116, 166

 Single extension algorithm, 100

 single phase algorithm: SPA, 106

ultrametric distance, 448, 449, 451

ultrametric matrix, 451, 475
